Col. Scott and Gen. Pope.

New York Letter to Detroit Post Col. Scott is one of the few men who have not been hurt in morals or in manners by remarkable pros-perity. In all the positions he has occupied, he has always been quiet and modest to an exemplary degree. When he was assistant secretary of war, and visited the southwest during the rebellion, he was frequently mistaken for a hanger-on in the army on account of those very qualities. He had occasion, in 1862, I think, to visit Gen. Pope at his headquarters in New Madrid Mo. Gen. Pope, as everybody

knows, is greatly addicted to pro-fanity and violence of manner, and was particularly so addicted at that time. Col. Scott entered the headquarters with the remark, "I should ike to see Gen. Pope on business." "See my adjutant!" roared out

Pope "My business is with Gen. Pope in perso**n.**"

"Blank, blank, your business; see my adjutant, I tell you."

"My name is Scott, and-" "I don't care whether your name is Scott, or Jones, or Smith, or Brown. See my adjutant, blank,

"As I was about to say, my name is Scott, and I wish to see you on government business. I have the honor to be assistant secretary of Pone's demeanor underwent a

revolution, as he said in the blandest manner: "I beg your pardon, Colonel; I had no intention to be rude, but there are so many loafers in camp, and they annoy me so much, that I am sometimes put cut of temper. Be good enough to take a seat, and have the kindness to inform me of your wishes." Colonel Scott entered at once upon the business in hand, making no reference whatever to Pope's outrageous behavior, though it is fair to presume that his forbearance and reticence taught the insolent general a lesson.

Its no fun for a hungry person to dine with Queen Victoria. It is not etiquette to eat of anything after she has finished with it, and as her Majesty eats very little the courses are hurried over. After dinner there is hardly time enough to take even one glass of wine before coffee is brought in. The Queen does not put her cup on the table, but sips a little as the servant holds it on the salver. Then her majesty rises, and of course the guests all rise and stand back from the table. Queen then makes the round of the room, stopping to talk for a few she may delight to honor.

HOW A CONVENTION 18, ORGAN-AUR CEA GESLE

The distance of yester by contains the following, which will be of general interest at this time:

The ceremony of opening a National Convention and effecting an organisation is as follows. The convention is colled to order by the chairman of the National Committee, and the proceedings are opened with prayer by some elergyman s lected for the purpose. The chairman of the National Committee then makes a brief address appropriate to the occasion, closing with nom instion of a temporary chairman. After his election and induction, the temporary chairman delivers an address, and invites the convention to proceed to the business of organization. Temperary secretaries are then appointed

and the following committees, Yix Committee on credentials, committee on permanent organization, committee on rules and order of business, committee on resolutions. These committees ere appointed by calling the roll of the States and Territories, the chairman of such delegation assouncing the names of the persons selected to serve on each committee. The constitution of these committees, including the roll-call of States, necessarily occupies considerable time. Ordinarily, when a State or Territory is reached where there is a contest, that State or Territory is passed on the roll-call. If an exception is made to this rule at Chicago it will be made to this rule at Unicago it will be in the nature of a compromise. The and the committee on oredentials committees thus appointed hold through the permanent organization. In full view of the delegates and spectators at the Chicago convention has been placed a large and striking portrait of Senator Chandler. It is, that Grant will not A gentleman who parted with him on only got the nomination, but feet it on a card in the Times, in which he gives F. Hoar for president.

In his judgment General Grant was the man who should be nominated.
With him he regarded the result in New York as certain; without him we would be in danger of losing that state. He mentioned no name in connection General Grant. He said that with him in the leadership and at the head of affairs, there would be a degree of publie security which could not otherwise be obtained.

It is admitted there will be a minority report of the committee on credentials, and the question of the admission of contesting delegates will come before the convention to morrow morning. At General Sheridan's headquarters tonight the following estimates were made of the first ballot after the unit rule is abrogated: Grant 297, Blaine, 276, Sherman, 138.

The name of Garfield has been quite frequently mentioned to-night as a possible compromise.

THE GRANT CAUCUS.

In the Grant caucus to-night a short Mr. Conkling said there was no use

concealing or perverting facts. It was time now to look matters squarely in the face. Not more than 300 votes were assured for Grant on the first ballot. They need not count on more unless they secur ed them hereafter. He advised, however that they hold together through the first, second and to the 10th bullot, if necessary, but not to yield They would eventually worry out their opponents and win They would neither offer nor accept a the world neither offer nor accept a come compromise. OUT OF THE OLD INTO THE NEW.

The well-known banking firm of J. Millikin & Co., composed of James Millikin, J. R. Gorin, Milton Johnson and O. B. Gorin, took possession of their elegant new banking house, on the northeast corner of Water and East Main streets, this (Thursday) morning, and are now ready to transact all business in their line with their usual promptness and despatch.

gant New Banking House-A

Bolid Firm.

Our reporter made a tour through the new bank this morning and jotted down a few items of interest to our readers. In the first place the firm has spent about \$1,500 in improving and beautifying the new location, putting in a stone and plate glass front, with a cut-off corner, enlargother minor improvements. A new counter, of much beauty and finish, has been put in at a cost of nearly \$600. It is one of the latest improved counters, and was built in Chicago. The new room gives ample space for the transaction of the firm's increasing business, is well-lighted, and is certainly one of the most central and inviting establishments in the city. THE VAULT. One of the necessary adjuncts of a

banking house is a good vault, where the cash of the bank and depositors may be kept with the greatest possible safety.--J. Millikin & Co.'s new vault was constructed regardless of expense, with an eye single to safets. The brick walls and roof are lined with chilled iron sheeting, half an inch in thickness, welded together with heavy bolts, just in the same manner as a steam boiler is made. With the best tools made it would take a burglar fully eight hours to cut through the iron sheeting, not mentioning the time that he would consume in tearing away the brick. The vault has a heavy iron door, with a combination time-lock: from the outside it looks as nest and trim as fine workmanship can make it. Inside the vault is one of Hall's latest improved burglar proof safes, weighing 7,000 pounds, and purchased at a cost of nearly \$2,000. It is as solid as a rock, and has an air-tight dove tailed door of massive weight. On the door is a fine time lock, which makes it impossible for anybody to open it except at a certain hour in the helmy! morning. Two shelves in the safe are daily used by the firm as a place of deposit for moneys in constant use, but in the lower part of the safe is a private receptacle with a combination lock on the door, in which the reserve fund of with stacks of greenbacks and gold this morning when our reporter took a peep car-loads of freight for Indianapolis into it through the open door. This fund will not be disturbed except on extraordinary occasions, when there is a "run" on the bank, or something of that kind.

Resting against the side of the vault is a safety deposit iron pigeon hole case, containing 102 iron-lined receptacles. Each pigeon hole is numbered and has an iron days. door with a combination lock and duplicate keys. This case the firm place at the disposal of the public and will give at \$10 and \$15 per year. In this case will be kept the private papers, bonds, and us that D. H. From the foregoing it will be observed that J. Millikin & Co. have expended not less than \$8,000 in making the improvements and additions named. To day the new bank was thronged with visitors and depositors who dropped in to examine the vault and safes, and make a general survey of the premises. The members of he is at Lincoln now, applying the Evans the firm and Park Hammer, the teller, gave all a cordial welcome, and took pleasure in showing everybody through the establishment. It is certainly one of the finest and most complete banking houses in the west, and a credit to our flourishing city.

L. P. Chickender Commercial, at 1785 A correspondent writes auxiously as to the amount of money in the United States. We have several times attempted to give full information about this, but here it is again: "In 1854 Mr. Guthrie, secretary of the treasury, estimated the coin in the United States at \$241,000,000; in 1861 Mr. Pollock, superintendent at the United States Mint, at \$271,000,000 to \$300,000,-000. It is now estimated by the chamber of Commerce reports of New York that the coin in the United States amounts to \$433,000,-000, which is largely in excess of any report yet made. Add to said coin the national bank notes in circulation, \$324,000,000; also the legal tender notes, \$346,000,000, total circulation, \$1,104,000,000. The importations of coin from Europe have caused the volume of circulation to be greater and of a better quality than ever had before We have unexampled abundance of money and low rates of interest."
